

370z| Cars and Coffee

1. Screenshots of all views of your application displayed in your browser.

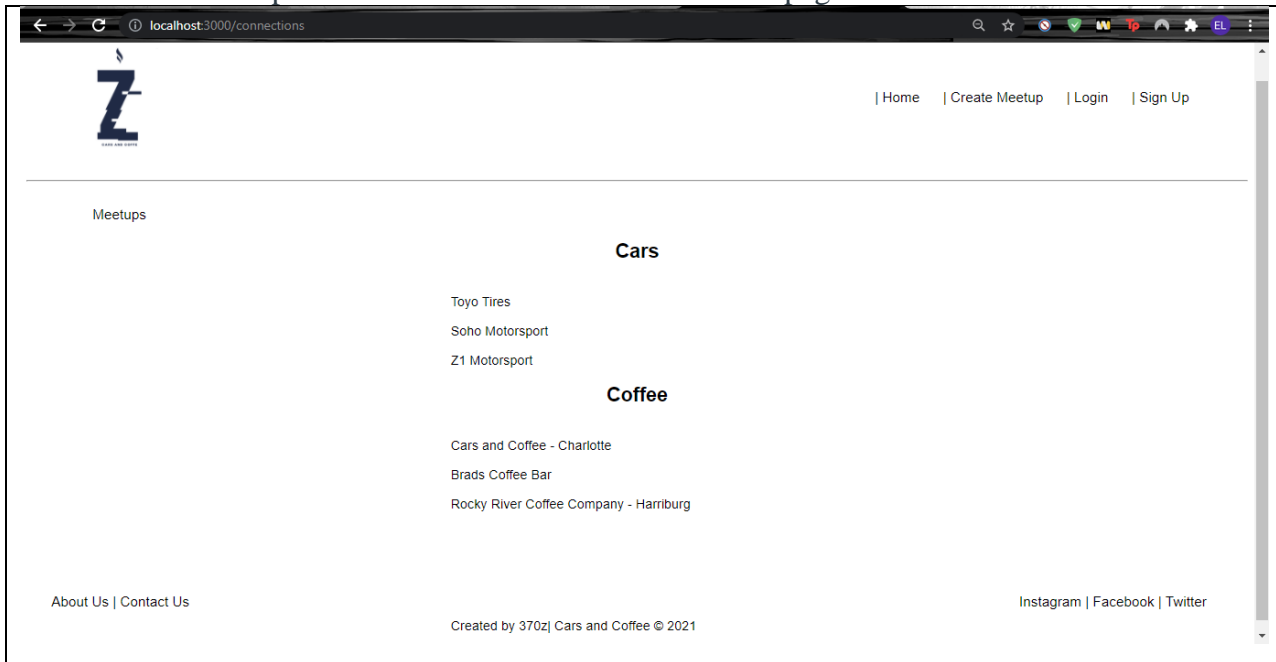

- This is my homepage, I had to zoom out a bit and still couldn't fit the entire page if you scroll you will be able to see the about and contact page when you open my site.

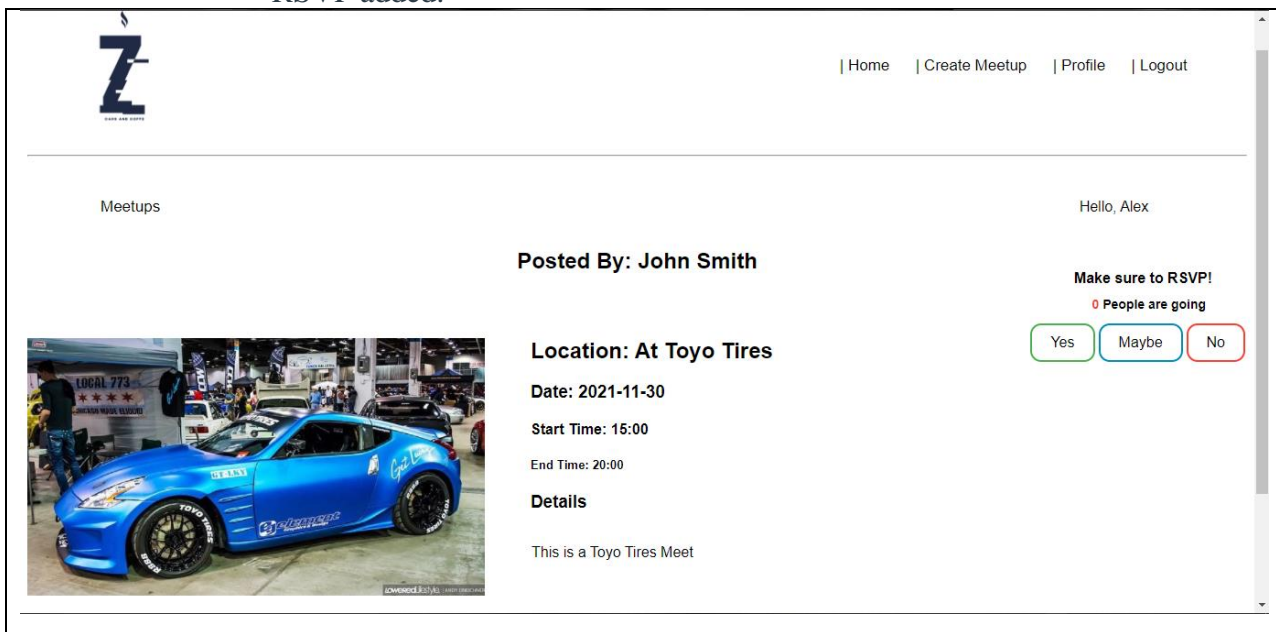

- This is my connections/new where users can submit a new connection, I had to zoom out a bit and still couldn't fit the entire page if you scroll you will be able to see the about and contact page when you open my site

- This is my /connections page, this page shows 2 different topics and their sub posts. I had to zoom out to fit the entire page.

- This is my connections/61845e8a435fb487baba1b10 (Toyo Tires) page, if users click this page they will be able to see information about said post with RSVP added.

- This is my connections/61845e8a435fb487baba1b10 (Toyo Tires) page after user clicks update, when a user is done making changes they can click submit to save changes. I had to zoom out so nav bar and foot page is available to view if you scroll.

- This is my connections when there are no connections available to view.

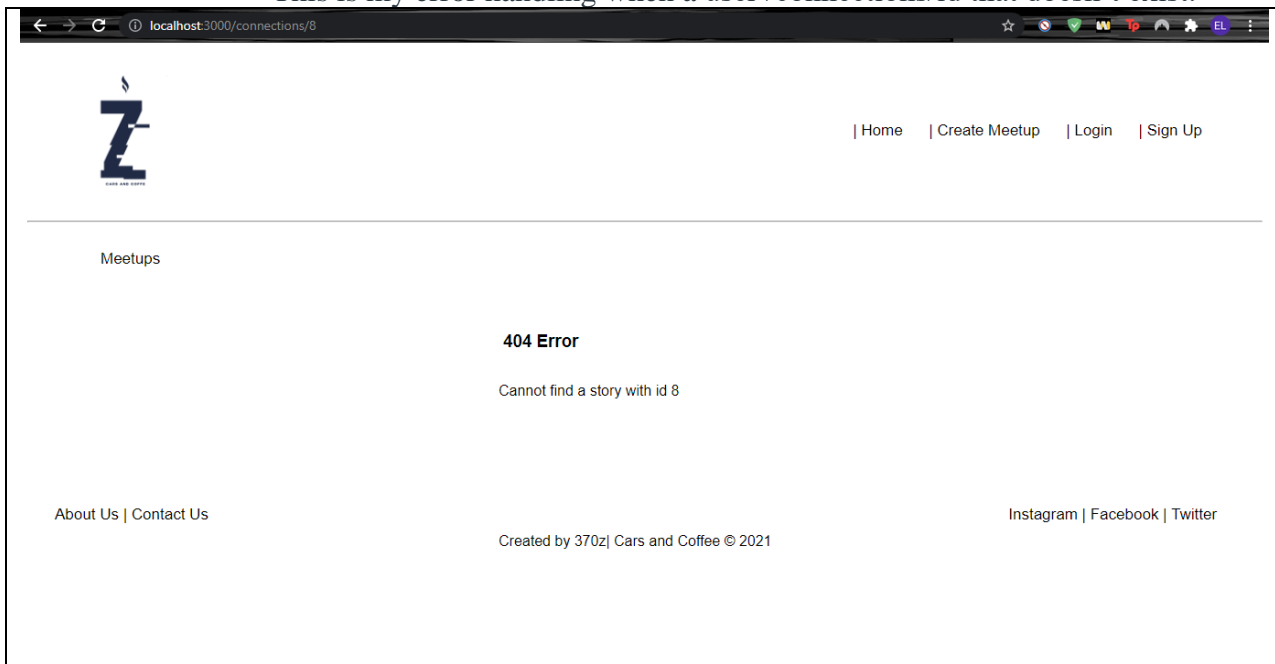

- This is my error handling when a user enters a page that doesn't exist or when the id is not 24bit.

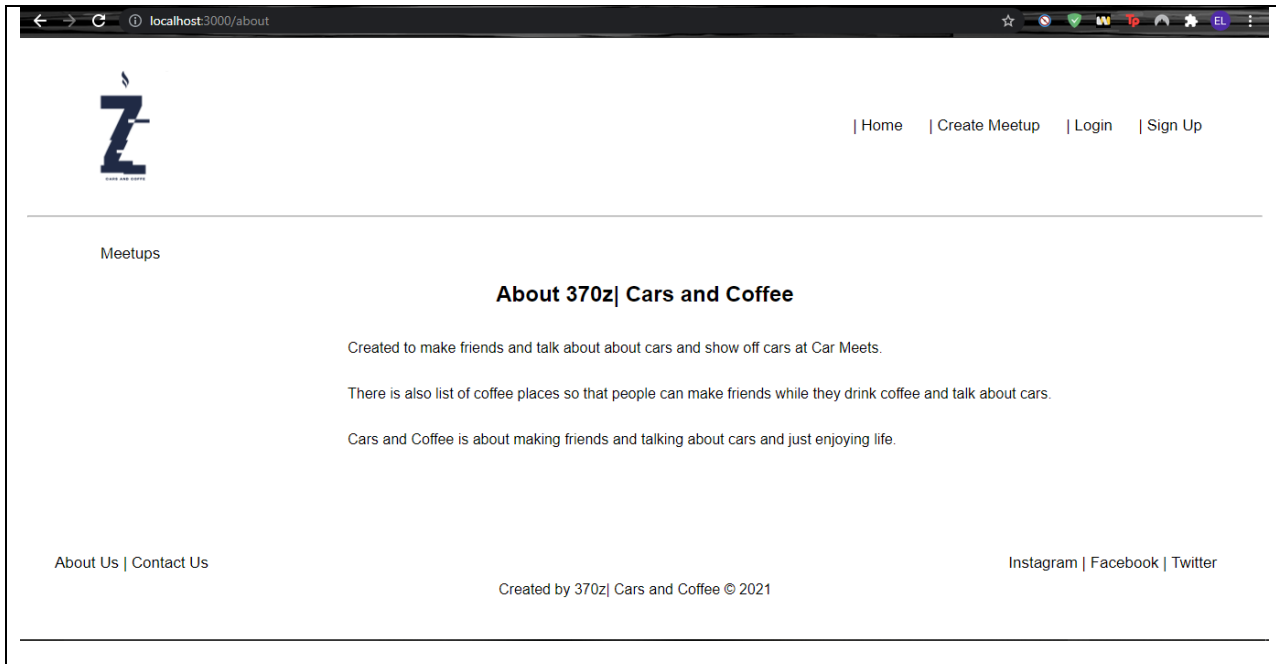

- This is my error handling when there is an internal error/ something wrong with code.

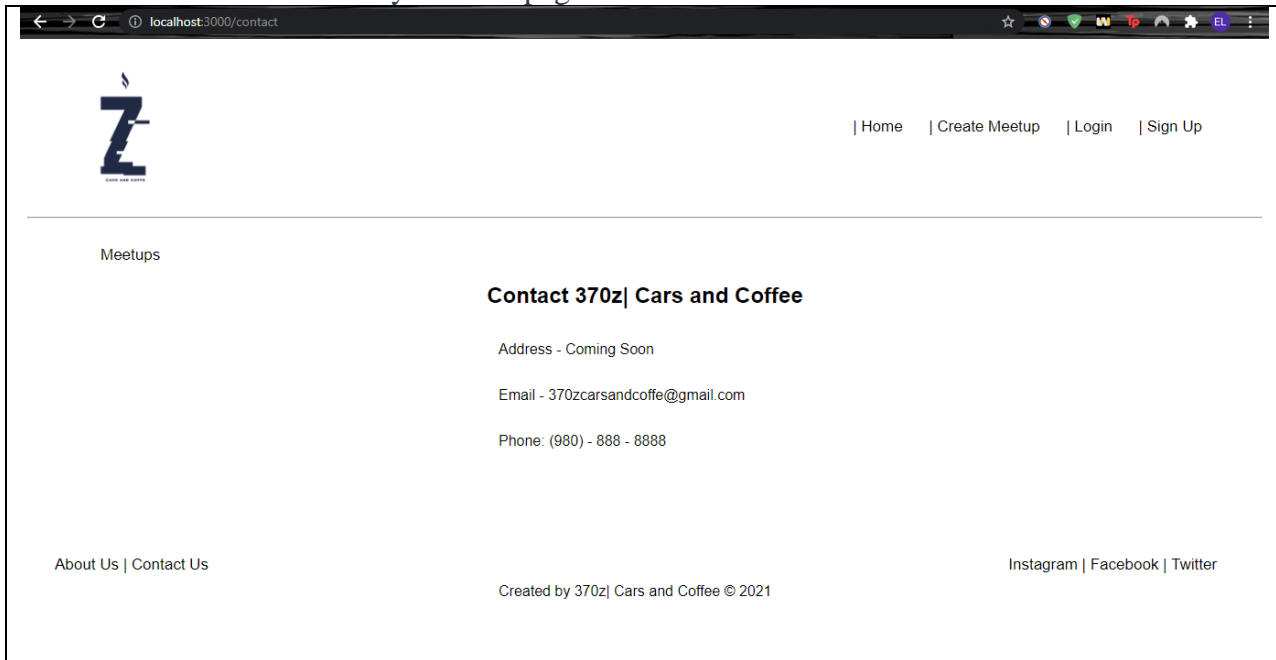

- This is my error handling when a user /connections/id that doesn't exist.

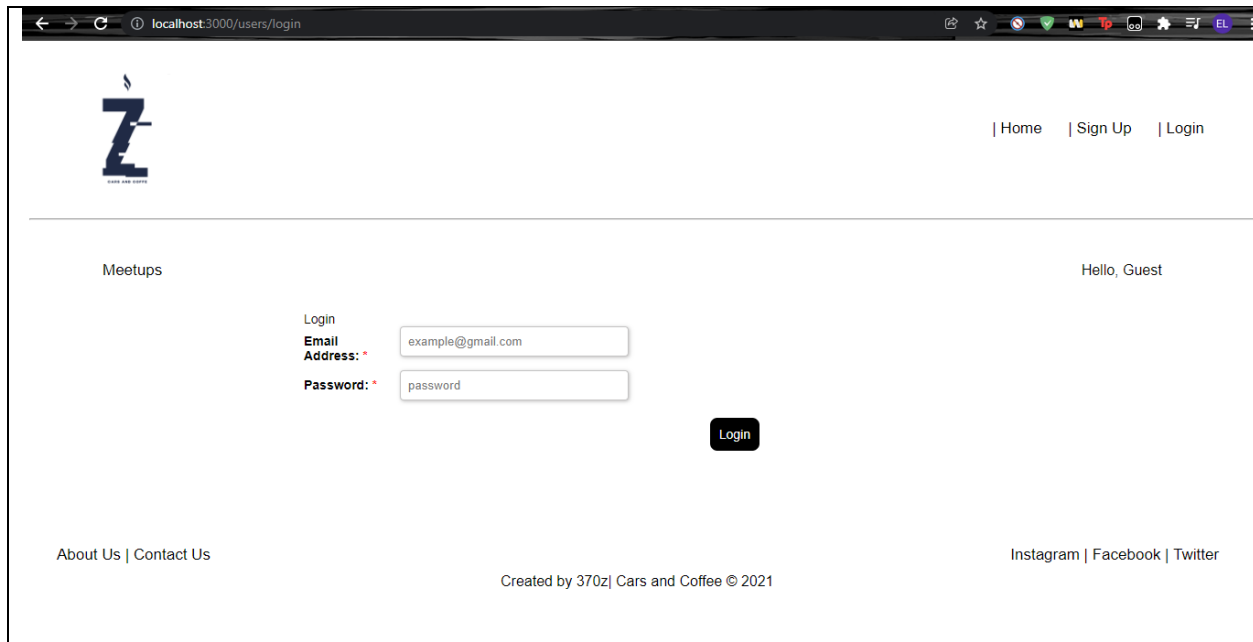

- This is my /about page.

- This is my /contact page

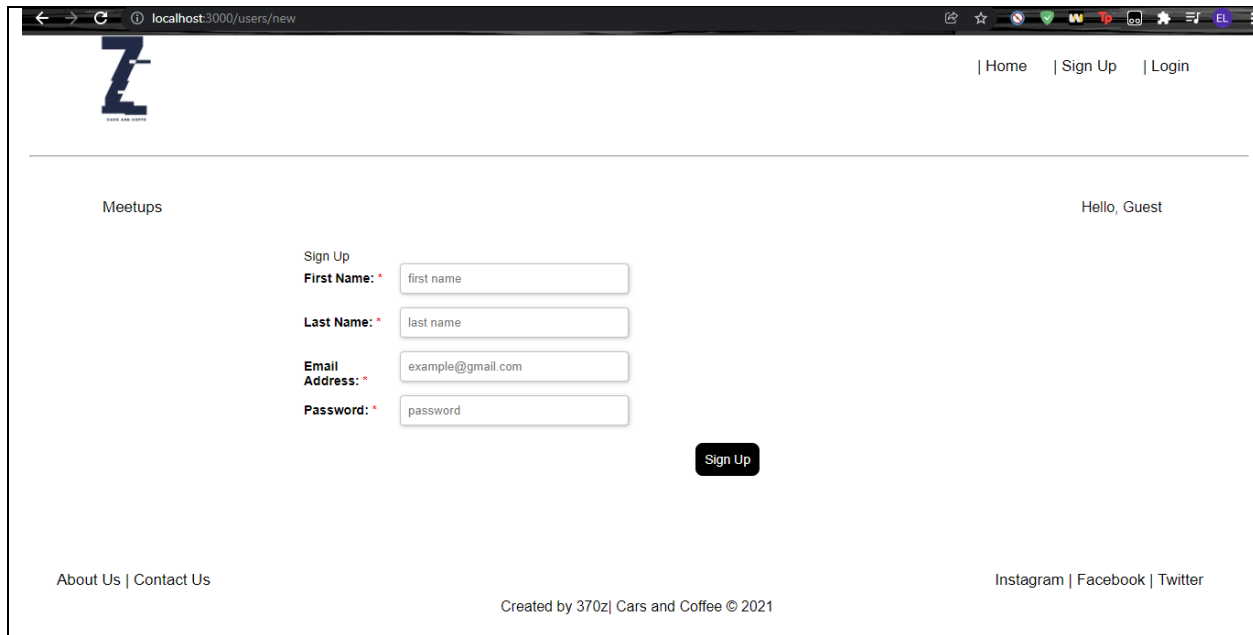

- This is my login page

The screenshot shows a web browser window with the address bar displaying 'localhost:3000/users/login'. The page features a logo on the top left, navigation links ('Home', 'Sign Up', 'Login') on the top right, and a 'Meetups' section on the left. The main content area is titled 'Hello, Guest' and contains a login form. The form has fields for 'Email Address' (with the placeholder 'example@gmail.com') and 'Password' (with the placeholder 'password'). A 'Login' button is positioned below the password field. At the bottom of the page, there are links for 'About Us' and 'Contact Us', a copyright notice 'Created by 370z| Cars and Coffee © 2021', and social media links for 'Instagram', 'Facebook', and 'Twitter'.

- This is my Sign-up page which can be accessed at /users/new

The screenshot shows a web browser window with the address bar displaying 'localhost:3000/users/new'. The page layout is similar to the login page, with a logo, navigation links, and a 'Meetups' section. The main content area is titled 'Hello, Guest' and contains a sign-up form. The form has fields for 'First Name', 'Last Name', 'Email Address' (with the placeholder 'example@gmail.com'), and 'Password'. A 'Sign Up' button is positioned below the password field. At the bottom of the page, there are links for 'About Us' and 'Contact Us', a copyright notice 'Created by 370z| Cars and Coffee © 2021', and social media links for 'Instagram', 'Facebook', and 'Twitter'.

- After you successfully login you're redirected to the profile page, with the list of connections the user has created with RSVP included.

localhost:3000/users/profile

2. No additional features as of now.
3. Everything should be complete, project 5 is officially complete, and everything that was required should also be complete.

4. Project 5 which was also the final project, this project was really tricky, it required paying attention and doing especially during the RSVP installment. When I messed up anywhere, it was super difficult to debug and required a lot more effort. There were also a lot of technicalities involved so I had to be careful with every line that I added. Besides the RSVP part, adding validation to the backend was pretty easy and self-explanatory since we had a lot of practice with it. I didn't struggle with that part. Everything as of now is complete and run. Reflecting back on everything, paying attention to those videos definitely paid off because it thought you basically step by step on how to implement each functionality. Videos were super helpful.
